MEDICAL REPORT

RE: NGOKERE CHINONSO

REF: UCTH/22/12//345231

The above named male presented to our clinic with complaints of abdominal pain and swelling at the right lower region of the abdomen.

Clinical examination of abdomen show reducible mass measuring 2by 4cm in diameter and result of abdominal pelvic ultrasound done show features mild obstruction.

A diagnosis of right inguinal hernia was made. He is currently booked for surgery (Herniorrhaphy) on the 12th of January 2023.

Kindly exempt him and provide all necessary assistance he may request from you within this period (11th -22nd January) 2023.

Accept our warm regards.

Mabel Anam
